Tachyon Networks Secures Access to Financing with Silicon Valley Bank

Funds to Strengthen Position for Further Growth in Government and Enterprise Broadband Satellite Markets

San Diego, CA, August 18, 2010 – Tachyon Networks today announced the completion of a \$2 million Revolving Line of Credit and a \$2 million Equipment Term Loan with Silicon Valley Bank. From fiscal year 2007 through fiscal year 2009, Tachyon's revenue grew at a CAGR of 19%, and is positioned for further growth in 2010. This growth is fueled by an increase in Tachyon's Satellite Comms-on-the-Move (COTM) and Government Networks Business.

"Tachyon's core business has successfully expanded into the military airborne Intelligence, Reconnaissance, and Surveillance (ISR) market with the launch of our industry-leading broadband mobile communications solutions," stated Peter Carides, CEO of Tachyon. "This line of credit and term loan from SVB gives us additional flexibility to adapt to ever-changing government market needs."

Tachyon will continue to drive growth via investments in equipment and service offerings for various end markets from airborne comms-on-the-move (COTM) for military customers to ruggedized and easily deployable communications solutions for oil and gas, alternative energy, construction, mining, and special events.

"SVB has been a great partner over the years, and we are excited about expanding our relationship," said Miguel Hernandez, CFO of Tachyon. "Access to both of these facilities strengthens our ability to support our growth plans."

"We have enjoyed watching Tachyon's impressive growth over the past few years and are proud to be their financial services partner," said Buzz Kreppel of Silicon Valley Bank in San Diego. "We look forward to continuing our relationship and providing Tachyon with the resources they need to be successful and serve their clients."

About Tachyon Networks

Today's Tachyon engineers custom, end-to-end satellite solutions for fixed, portable and Comms-on-the-Move (COTM) applications, delivering the highest quality managed network services for data, voice and video. Tachyon serves
